Nimesh Solanki

PROFESSIONAL SUMMARY

I'm a Full Stack Web & Voice developer with a keen interest in Conversational AI.
Open to working remotely 📶

EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER - II
Nova Benefits, Bengaluru, India, November 2022 - Present
Built notification engine from scratch; scaled capacity 6x monthly to support 10x increase in client base and associated notifications. Integrated 3rd-party insurance APIs, reducing claim processing times by 30 minutes per claim for 10 claims associates.

SOFTWARE DEVELOPMENT ENGINEER - I
Nova Benefits, Bengaluru, India, November 2020 - November 2022
I work on the backend as well as on Frontend. I contribute in building sub-modules of Microservices written in Vue 2 / Node.js / TypeScript using GraphQL to query the data stored in PostgreSQL which run on AWS

SOFTWARE DEVELOPER INTERN
TapChief, Bengaluru, India, January 2020 - April 2020
For the major part of the internship, I worked on building the onboarding flow for businesses and consultants (i.e. users). Also helped the company to deploy it on Heroku Tech used: Angular 7 , TypeScript, Heroku.

PROJECTS

YOUTUBE PLAYLIST SORTER [PROGRESSIVE WEB APP] ↗
A Web-app which sorts a public playlist based on its popularity Try it out: ↗

BIGBASKET SLOT NOTIFIER ↗
A watcher that hits the Bigbasket API for checking the availability of slots. Developed during COVID-19 to notify the user once a slot is available. Used Chrome Dev Tools to learn how to use BigBasket's API.

PDPU SCHEDULER [ACTIONS ON GOOGLE] ↗
Voice App for Google Assistant which tells the students about their day to day schedule including their lectures and labs.

GDG AHMEDABAD VOICE APP [ACTIONS ON GOOGLE] ↗
Voice app that tells the users all the information about Google Developers Group, DevFests and core-committe members of GDG Ahmedabad. It also shows information about the past meetups of GDG Ahmedabad, shows the schedule of all talks.

A LOT MORE PROJECTS ... ↗
